Aslantaş, Ö., Seferoğlu, Y. and Türkyilmaz, S. 14

Phylogenetic Characterization of *Escherichia coli* Isolates Obtained Before and After Vaccination from Broilers with Colibacillosis

E. Sur, M., K. Türkyilmaz and S. Türkyilmaz 21

CASE REPORT

Treatment of Sulfonamide-Hypersensitivity Associated Thrombocytopenia with Human Intravenous Immunoglobulin in a Dog: A Case Report.

Sugar, N. and Chen, H. 32

Front Cover: **AFRICAN FISH EAGLE** (*Haliaeetus vocifer*)

The *African Fish Eagle* are found across sub-Saharan Africa and are iconic symbols of African wildlife. The African Fish Eagle are known for their striking appearance: a white head and chest, dark brown body and wings, and a strong, yellow beak with a black tip. They are often seen near large bodies of open water with an abundant food supply and are famous for their distinctive, ringing call. The African Fish Eagles primarily feed on fish, which they snatch from the water with their powerful talons, as seen in these images.
